

Giving LPFM stations priority over national/region services on FM translators could force the radio station K-LOVE off the air. This would a loss to my community. K-love offers a positive and family safe station for a community that does not have the resources to produce a station of this quality. Though K-love is a national station, I have learned about events in my own community on the "Community Calender" which is broadcasted regularly. K-love offers this free form of advertising to churches and non-profit groups in my community who are putting on non-profit events and services. With out K-love these local groups would either have to pay for radio advertisements, or more likely, go without. I believe K-love is an encouraging station providing music and services for my community that no other station is providing. Please don't let an LPFM station take priority over K-LOVE! kim
